

Compaq Wireless Mobility Solution for Physicians

Deliver more efficient, higher quality patient care

From dawn to dusk, physicians are on the move, from bedside to office, generating orders, prescriptions and documentation all along the way.

Now, armed with hand-held wireless devices, physicians can use every minute more productively to streamline processes and get real-time data at the point of care.

Soon wireless technology will be an indispensable aid to medical care. Compaq can be your single source for an end-to-end mobile solution that includes all the ingredients for success:

- > Leading physician applications from Allscripts Healthcare Solutions, Inc.
- > State-of-the-art hand-held devices, servers and storage from Compaq
- > Life-cycle services that help you plan, design, implement and manage your solution

Business results

- > Streamline processes — Automate labor-intensive, time-consuming processes that take valuable time away from patient care
- > Improve clinical care — Receive and communicate real-time information at the point of care. Reduce medical errors and make better clinical decisions
- > Increase practice revenues — Capture charges accurately at the point of care. Improve billing processes and lower overhead costs
- > Get the right solution — Rely on trustworthy Compaq expertise in wireless technology and Allscripts' experience in clinical automation to get the solution you need, executed seamlessly

Experience you can trust

Serving 20,000 physicians across the U.S., Allscripts is the leading provider of point-of-care decision-support tools for physicians. Allscripts' TouchWorks solutions automate a wide spectrum of common physician activities.

Compaq is one of the top two systems integrators in the world, and has over 20 years' experience in implementing complex enterprise solutions. It has the robust hardware products and expert services needed to integrate wireless technology successfully into any environment. The award-winning Compaq iPAQ™ Pocket PC is widely recognized as one of the top mobile products on the market today.

Compaq and Allscripts have formed an alliance to deliver best-in-class wireless solutions for the healthcare community.

Start small and build

Allscripts' modular approach, coupled with the Compaq Computing on Demand program, lets you start with a single application, the right-sized server infrastructure, and services to rapidly deliver high-impact patient business capabilities into your physicians' hands. With this approach, you can evolve over time to a complete mobile electronic medical-record system. Choose the applications that meet your needs:

- > **Workflow** — manages tasks and triage routing
- > **Charge** — captures charges at the point of care
- > **Dictate** — enables voice dictation and transcription

- > **Document** — supports dictation, transcription and document management
- > **Rx+** — manages prescriptions and medications
- > **Order** — enables electronic order transmission
- > **Result** — gives Web access to test results
- > **Note** — provides structured charting
- > **Pocket Library** — gives access to reference tools
- > **Physician Homebase** — offers a portal to many applications

Allscripts' 10-year strategic partnership with IDX Systems Corporation helps ensure that any application in the TouchWorks suite can be easily integrated with IDX's practice-management system.

Services make it work

With expert help from Compaq Global Services, you can be sure of a secure, fast, safe implementation of your mobile solution with maximum performance. Life cycle services include:

- > **Art-of-the-Possible Strategy Services** — We guide you through a detailed process to identify solutions that meet your goals and help you comply with legislation such as HIPAA.
- > **Mobility Architecture Services** — We design a wireless infrastructure that is closely aligned with your practice goals, applications and IT infrastructure.

- > **Mobility and Wireless Assessment Services** — We assess the readiness of your applications and infrastructure to support mobile solutions.
- > **Wireless Network Design** — We design a secure, wireless network that maximizes throughput and locations for access.
- > **Hardware Configuration Service** — We ensure that your hardware configurations will support the TouchWorks mobility applications.
- > **Wireless and Hardware Installation** — Compaq installs and tests your wireless access infrastructure: backbone, servers, network IDs, logical server connections and modification of wired elements.
- > **Staging and Application Integration** — We ensure that the total solution is staged, tested and integrated with your legacy systems.
- > **Hardware and Application Support** — We provide maintenance and 24 x 7 support for the mobile devices, servers and TouchWorks applications.

You may also choose to outsource the entire mobility solution to Compaq. With **Managed Mobility Services**, Compaq delivers, manages and supports a complete wireless solution. Rather than acquiring the components with capital dollars, you pay a monthly service fee per user.

Move forward with confidence
